Professional Summary

BSc IT graduate focused on frontend and full-stack web development, with hands-on experience building production-style applications using React, TypeScript, MySQL, and REST APIs. Built production-style projects including SmartMark, AirCare AI, and Morph Studio, showcasing experience across frontend development, backend integration, deployment, and application maintenance.

Technical Skills

Languages: Python, React.js, Typescript, Javascript, HTML, CSS

Frameworks: Bootstrap, Flask, OpenCV

Tools: GitHub, VSCode

Databases: Firebase, MySQL

Tools & Platforms: Git, GitHub, Vercel

Projects

SmartMark - Face Recognition Attendance System

- Developed a full-stack AI-powered attendance management system using Python, Flask, Firebase, and OpenCV, enabling secure role-based access for Admin, Teacher, and Student portals.
- Implemented face recognition-based attendance verification using OpenCV and the face_recognition library, automating attendance marking and minimizing proxy attendance.
- Designed and integrated a Firebase Realtime Database to manage student records, courses, attendance logs, announcements, and academic workflows with real-time synchronization.

Morph Studio – UI Generation Platform

- Developed a modern UI design platform using React.js, TypeScript, Vite, and Tailwind CSS with a responsive and interactive interface.
- Built reusable components and responsive layouts to create a clean and consistent user experience across devices.
- Implemented modern animations and interactive visual effects to enhance user engagement and overall interface design.

AirCare AI – Air Quality Management System

- Developed a real-time air quality monitoring platform that provides live AQI, weather conditions, and pollutant information for searched cities.
- Integrated AQICN and Open-Meteo APIs to display real-time environmental data along with personalized health recommendations based on air quality.
- Designed a responsive dashboard with city search, environmental analytics, and interactive visualizations to help users monitor air quality trends
